

Sketch Cache Cleaner

Sketch Cache Cleaner is an app that deletes hidden Sketch history files that can take a lot of space on your hard drive and that you would probably never use.

Warning

The app idea inspired by two blog posts: [How Sketch took over 200GB of our MacBooks](#) & [How to recover 50 GB or even more by deleting Sketch caches files](#)

Please, read them in case you want to know how it works.

If your **workflow** relies on **automatic versioning** by macOS (Time Machine etc.) - **DO NOT USE THIS APP!**

The app will remove all files in folder: `/.DocumentRevisions-V100/`

System Requirements

- macOS 10.13+
- Xcode 11.4+

- Swift 5.2+
-

Changelog

[1.0.7] - 2020-30-03
